

Sharps shields

Ré f. PRA3

Principle

This lead shielded container is ideal for storing used contaminated sharps. There is a small lid for quick access to remove the needle and a larger, hinged lid for removal or replacement of the inner plastic container. The sharps shield is adaptable to various size disposable sharps containers.

Presentation

Easy decontaminable stainless steel finish.

Shielding: 3 mm lead.

Inside dimensions

L.200 x H.170 x D.132 mm.

Weight: 12.4 kg

Other dimensions on request.
